

The Ultimate Graffiti Removal System

Model GPMT-H/W shown with various options

Model GPMT-H/W

The Roadline Products Model GPMT-H/W is equipped with hydraulic-driven airless pumps. There are several advantages in an airless paint system over a conventional paint system.

Some of these advantages are less over spray, savings in material, faster clean-up, less noise, no paint pots to clean, and higher productivity; which ensures a higher level of PUBLIC SAFETY!

Standard Equipment

- 12 GPM Hydraulic Pump
- High Pressure Water Blasting System
- 2 Complete Airless Paint Systems
- Removable Paint Tray
- 2 Removable Gun Holsters
- Below Deck Tool Box
- Traffic Cone Storage
- 30-Gallon Headboard Hydraulic Reservoir
- Paint Well (7 5-Gallon Bucket Capacity)
- 230-Gallon Water Tank

Optional Equipment

- Additional Complete Airless Paint Systems
- Electric Hose Reels For Special Applications
- Arrow Board or Message Board
- Rotating Lights
- Work Lights For Night Time Operation
- Sodium Cleaning System
- Compressor System
- Vacuum System

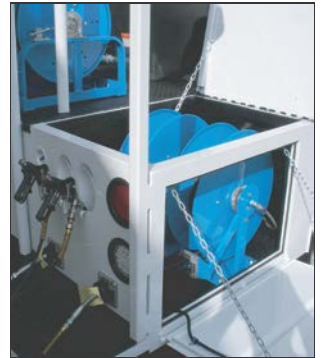

Up to six hydraulic-driven paint systems can be supplied

Optional Compressor System

Optional Vacuum System with 50-Gallon Drum

Standard hose reels that accommodate 50' hoses

Water Blaster Specifications

Model:	RP-5305EB
Capacity:	5.0 GPM
Pressure:	3000 PSI
Engine/Motor:	16 HP Vanguard / Electric Start
Burner, Pressure:	11 VOL
Atomizing:	KERO, #1, #2 DSL
Auto, Ignition:	350,000 BTU
Fuel Consumption:	2.25 GPH
Fuel Tank Capacity:	9.5 GAL
Gas Tank Capacity:	2.7 GAL
Hose:	3/8" X 50'
Dimensions:	38.5"H X 49"L X 30"W
Weight:	850 LBS
